

## SEGUGIO WIRELESS

### DDMSM1

Methane

### DDGSM1

LPG

## WIRELESS ENABLED GAS LEAKAGE DETECTOR METHANE or LPG

Version of SEGUGIO plus METANO/GPL equipped with a wireless radio transmitter. Microprocessor methane gas detector for domestic application, with output for both 230V~ and 12V~/= cut-off valves. Mute and test functions. The compliance with CEI-EN 50194-1 certifies the absolute reliability and efficiency of the device. The wireless transmitter module allows to transmit "failure" and "alarm" states to the receiver for gas alarm DRG01M.

**Pre-calibrated sensor (ACMM01 METHANE, ACGM01 LPG), replaceable directly by the user.**

### TECHNICAL FEATURES

Power supply	230V~ 50Hz
Output (relay)	6(2)A @ 250V~ SPDT
Sensor type	SnO2 Semiconductor
	Pre-calibrated sensor, directly replaceable by user
Sensor life	5 years
Alarm threshold	10% L.E.L.
Green LED indicator	Detector active
Yellow LED indicator	Detector failure
Red LED indicator	Alarm
Alarm buzzer	85dB (A) @ 1m
IP rating	IP42
Dimensions	H84 W148 D40mm
Transmission frequency	868,150 MHz
Max distance receiver	50 m
